ART 262: ART OF CLASSICAL GREECE
SUMMER SESSION II
MTWRF 9:15 - 11:15 AM
TAUGHT BY EMILY OLSON

The course will examine the development of Greek art and architecture from the fifth through the first centuries BCE and from a wide geographical spectrum. It will also briefly consider earlier works from the Greek Geometric, Orientalizing, and Archaic periods (ca. 900-480 BCE). Emphasis is placed on identifying and understanding various artistic styles and on recognizing major architectural monuments and individual works of art in sculpture and painting. We will discuss Greek and Hellenistic art not only in terms of style and development, but also with respect to its context, from its original setting to its political, religious, and socio-historical background.
